7. New conclusions of the dissertation:

First, the dissertation contributes to the development and systematization of a comprehensive theoretical model of the quality of moral education for university students; identifies the constituent elements and criteria for evaluating the quality of moral education; and analyzes the factors affecting the quality of moral education for students at universities in the Red River Delta in the current period.

Second, the dissertation analyzes the current situation of the quality of moral education for students at universities in the Red River Delta in recent years, based on an assessment of achievements, limitations, and the causes of these achievements and limitations. On that basis, it clarifies the issues that need to be addressed in moral education for students at universities in the Red River Delta today.

Third, the dissertation presents viewpoints and proposes a system of fundamental, appropriate, and feasible solutions to improve the quality of moral education for students at universities in the Red River Delta in the coming period. These new contributions possess both theoretical and practical significance, contributing to policy orientation and the development of strategies for education and quality management of moral education in the context of the current reform of higher education.
